Mt. Kurodake, known as one of the most beautiful mountains of the Daisetuzan mountain range, is easily accessible by Ropeway and chairlift. Each of the four seasons on Mt. Kurodake has their own unique beauty and provides opportunities to enjoy them throughout the year: fresh green leaves in spring, a wealth of scenic flora in summer, colorful fall foliage, snow-covered slopes ideal for skiing and snow-boarding in winter. Please enjoy Mt. Kurodake!

The trees with bark-splitting caused by freezing can be observed here. A viewing platform from where the Mt. Kurodake seems closer. The famous scenic spot for Japanese Alpine Cherry (Prunus nipponica), the Japan’s late-blooming cherry tree, is also visible. The mountain-climbing shoes/boots are recommended. The snow play area is open in winter. Mt. Kurodake is known for its wealth of alpine flora and fauna, as well as of the four seasons of the Daisetsu Mountains national treasures of Japan.

Platform is around 200 m.

There are footprints on a promenade left by Hokkaido deer and Woodpecker holes. Woodpecker is one of the living national treasures of Japan.

Takamatsudai

Reference Hall/Contains numerous original photographs of the natural flora and fauna, as well as of the four seasons of the Daisetsu Mountains.

The Sounkyo-Ropeway Station (the 5th station)
